

ITS FLAXSEED OIL

NATURAL SOURCE OF OMEGA-3 FATTY ACIDS

WHAT IS ITS FLAXSEED OIL?

- Flaxseed oil is a rich source of omega 3, 6, 9 fatty acids which are very essential for a healthy living.
- Flaxseed oil contains the active form of omega-3 fatty acid known as alpha-linolenic acid (ALA).
- Our body converts ALA into EPA and DHA during metabolism.
- Omega 3 Fatty acids (ALA, EPA, DHA) are called as Essential fatty acids as our body does not synthesize it and has to be fulfilled from diet.
- However, research clearly indicates that the conversion of ALA to EPA and DHA is extremely limited. Less than 5% of ALA gets converted to EPA and less than 0.5% (one-half of one percent) of ALA is converted to DHA.
- Omega 3 fatty acid supports joint health.
- Daily intake of flaxseed can help maintain healthy blood sugar levels.
- Flaxseeds also promote fat metabolism and contributes to weight management.
- It helps to maintain healthy mood and stress levels.
- It supports hormonal balance.
- It helps to lower bad fat “cholesterol” and “triglycerides” and works as cardio protective.

- **Everyone who wants to stay healthy & look young always**

● Problem with ALA is that it is very unstable and readily gets oxidized and available ALA for conversion becomes less.

● At any stage Flaxseed consists of 50-60% ALA so most products in market have around 65% ALA.

● With use of superior sourcing and superior cold press extraction technology we have achieved ALA content around **88% (highest in Industry)** and also stable which is very useful.

HOW TO CONSUME

1 Softgel capsules three times a day with water
(preferably with meals)

Each Bottle Contains 90 Softgel Capsules

Qty. - 90 Softgel
MRP - ₹525/-
